sequence derived from the nucleotide sequence encoding murine TRAF1 (SEQ. ID. NO: 1) or murine TRAF2 (SEQ. ID. NO: 3).--

--32. An isolated human tumor necrosis factor receptor associated factor (TRAF) which is the human homolog of the murine TNFR1 (SEQ. ID. NO: 2).--

--33. An isolated human tumor necrosis factor receptor associated factor (TRAF) which is the human homolog of the murine TNFR2 (SEQ. ID. NO: 4).--

Remarks

The amendments and the new Sequence Listing include the correction of duplicative references to the same sequences. Thus, original SEQ. ID. NOS: 45 and 50; 46 and 51 and 55 and 61, respectively, were identical. The current amendments correct this error.

The amendments in the specification are of formal nature. Support for the new claims is, at least, in the paragraph bridging pages 34 and 35; and at page 36, lines 9-19.

Respectfully submitted,
GENENTECH, INC.
